

MCKENZIE RIVER COMMUNITY VITALITY

Strategic Direction:

Invest in our natural assets, people, and economy to secure a vital future for our 50 mile rural McKenzie Valley – a place people are excited to visit and live.

Priority Vitality Indicators *source: OSU Extension

- Healthy and educated population
- Community support for resident's needs
- Diverse economy (eco-economy)
- Well-maintained, adequate built environment (road, utilities, building, parks, community system, public transportation)
- Adequate and diverse internal and external resources exist, are actively developed, and widely used to the benefit of the community
- Leaders are able to effectively engage in the democratic process and produce and implement quality plans for the community

Priority Goals:

Community Capacity:

Enhance coordination and communication between groups, expand volunteerism, and maximize partnerships.

Health:

Maximize opportunities for improved health and well-being of residents.

Rural Character & Environmental Quality:

Enhance the rural character of the community and quality of the environment. Foster environmentally sustainable communities.

Infrastructure:

Develop the infrastructure of the communities (e.g. high-speed internet and improved wastewater management).

Economy:

Enable and enhance economic development, maintaining the tourism and recreation focus while expanding opportunities for commercial enterprises, including small businesses.
